PROFESSIONAL SUMMARY

Python Developer with 1 year 3 months of hands-on experience building backend logic, automation scripts, and data-driven applications. Skilled in Python, SQL, Pandas, and REST APIs, with growing expertise in AI-powered cybersecurity, threat detection, and LLM-driven AI automation.

PROFESSIONAL EXPERIENCE

Python Developer — Meg World Technologies, Chennai

July 2025 – October 2026 | 1 year, 3 months

- Developed and maintained Python scripts and backend modules for day-to-day project requirements
- Wrote and optimized SQL queries and handled database operations using MySQL
- Integrated and consumed REST APIs to fetch, process, and exchange data between systems
- Cleaned, analyzed, and summarized datasets using Pandas and NumPy to support reporting
- Debugged issues, fixed defects, and improved code quality and performance

Python Developer Intern — Q Spiders, Bangalore (Nagavara)

June 2024 – November 2024

- Completed an intensive 6-month program in Python, data structures, and algorithms
- Developed and deployed Python applications focused on backend logic and scripting
- Worked on projects involving file handling, OOP, and database connectivity using Pandas and NumPy

PROJECTS

SentinelAI – AI-Powered Cybersecurity & SOC Automation Platform | AI / Cybersecurity

Tech Stack: React.js, TypeScript, Tailwind CSS, Python, FastAPI, Node.js, Google Gemini API, Scikit-learn, PostgreSQL, Redis

- AI-powered SOC platform for centralized security monitoring, threat detection, and incident management
- Hybrid threat detection engine: rule-based analysis, Isolation Forest, and statistical anomaly detection
- Google Gemini LLM for forensic investigations, threat explanations, and remediation recommendations
- Phishing detection, network security monitoring, MITRE ATT&CK mapping, and threat intelligence modules
- Incident response workflows, approval-based SOAR automation, RBAC, and security audit logging

PhishGuard AI – AI-Powered Phishing Detection & Threat Analysis Platform | Generative AI / Cybersecurity

Tech Stack: React.js, TypeScript, Tailwind CSS, Node.js, Express.js, Google Gemini API, Firebase, Firestore

- Phishing platform scanning emails, URLs, headers, and domains with risk scoring and classification
- SPF, DKIM, and DMARC authentication analysis to identify suspicious sender information
- Gemini AI for explainable threat analysis, investigation summaries, and recommended security actions
- Domain intelligence, IOC management, quarantine workflows, threat analytics, and RBAC

Student Result Management System | Python, SQLite, Tkinter

- Built a desktop application with CRUD operations, pass/fail and grade calculation, and report generation

Weather Data Analyzer | Python, Pandas, Matplotlib

- Analyzed weather data from public APIs and CSV files, visualizing trends with Matplotlib and automating reports

TECHNICAL SKILLS

Languages: Python, SQL, TypeScript
AI & Automation: Google Gemini API, LLM Integration, Scikit-learn, Isolation Forest, SOAR Automation
Cybersecurity: Threat Detection, Phishing Analysis, Incident Response, MITRE ATT&CK, IOC Management, SPF/DKIM/DMARC, RBAC
Libraries: Pandas, NumPy, Matplotlib, Tkinter, FastAPI, React.js, Node.js, Express.js, Tailwind CSS
Database: MySQL, SQLite, PostgreSQL, Redis, Firebase Firestore
Tools: Git, GitHub, VS Code, Jupyter Notebook, Firebase Authentication
Concepts: OOP, File Handling, Data Structures, REST APIs

EDUCATION

B.Tech, Electronics and Communication Engineering (2025)
Sri Venkatesa Perumal College of Engineering and Technology
Intermediate (2021)
Sri Sai Jyothi Junior College, Puttur
SSC (10th Grade) (2019)
RKSR Government High School

STRENGTHS

Quick Learner • Team Player • Problem Solving • Attention to Detail • Communication Skills
